Healthcare Interoperability Engine *As-a-Service*

Connect. Transform. Comply

Streamline patient data exchange
across EHRs, devices, and partners
no heavy lift on your team.

Why Interoperability Matters

Clinical Continuity:
Real-time, accurate
patient data wherever
care happens

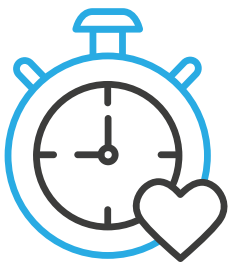

Regulatory Compliance: Built-in HIPAA,
HL7, FHIR, DICOM and audit logging

Cost & Time Savings: Eliminate custom
point-to-point integrations

Finding the Right Engine for Your Use Case

We analyze your clinical workflows, data volumes, and integration patterns to recommend the optimal interoperability engine configuration:

Lightweight Edge Engine

Ideal for small clinics or individual practices with low message volume—minimal footprint, rapid deployment

Scalable Core Engine

For multi-site practices handling thousands of transactions per day—auto-scaling containers, high throughput

Enterprise-Grade Hub

Designed for hospitals and health networks with complex routing and transformation needs—geo-redundant clusters, advanced governance

Each option comes pre-configured with the protocols you need (HL7, FHIR, DICOM, X12, SOAP/REST), so you get exactly the right **performance, reliability, and compliance** profile—nothing more, nothing less.

Service Packages

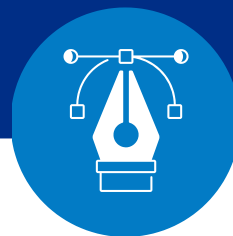

Starter

**Up to 5
interfaces,
standard
mapping
templates**

Ideal For

**Small clinics &
specialty MDs**

Professional

**5–20
interfaces,
custom maps
& 24/7 support**

Ideal For

**Multi-site
practices**

**Best
Seller!**

Enterprise

**Unlimited
interfaces,
dedicated
engineering
team**

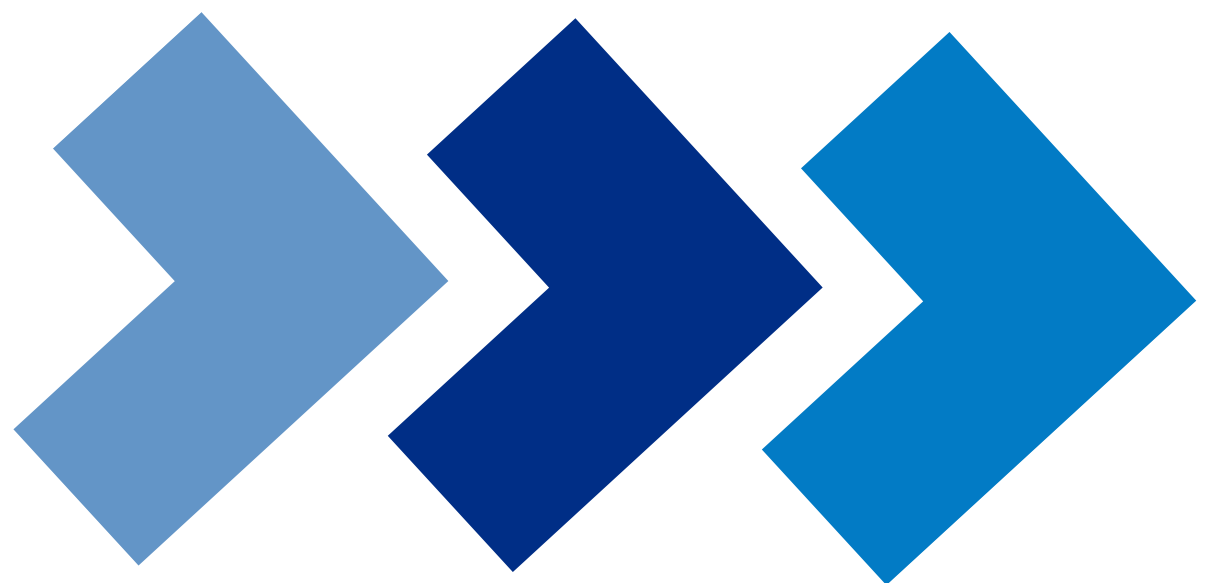

Ideal For

**Hospitals &
Health Networks**

How It Works

- 1. Onboard & Assess**
Deep-dive into your systems, data flows, and integration variation needs
- 2. Configure & Test**
We spin up your custom engine, map your interfaces, run validations
- 3. Go-Live & Monitor**
Switch traffic, tune performance, and enjoy proactive 24×7 support

We're **healthcare IT experts** with 10+ years automating clinical data exchange. We have been building software in many areas-industries for more than 20 years as well.

Ready to simplify your integrations?

*Fill out our form to get more info about
your project to speed up the process:*

- Free 30-minute consultation
- No-commitment pilot
- SLA-backed guarantees
