KEEP TRACK OF YOUR PRODUCTION ORDERS  
AND PRODUCT LIFE CYCLE NOW!

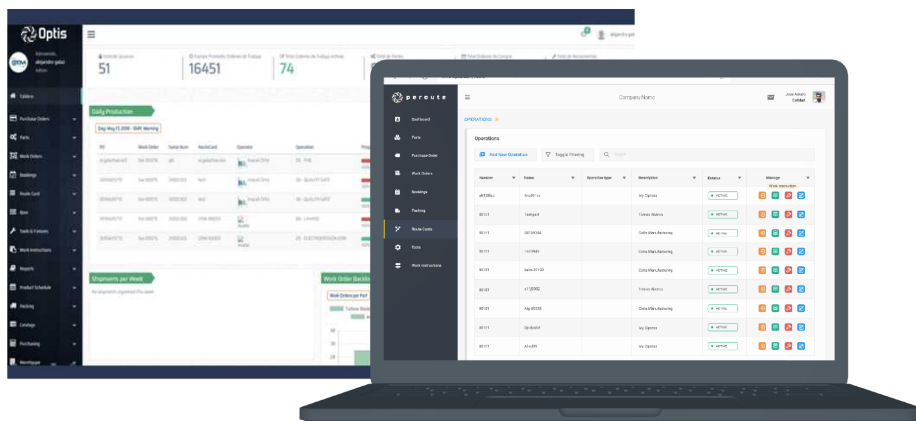

operoute

## ABOUT THE PROJECT

Operoute offers a multi-platform connectivity that allows a more efficient data flow that helps decision making by providing real insights to all stakeholders involved in the manufacturing process.

## THE CHALLENGE

Operoute offers a multi-platform connectivity that allows a more efficient data flow that helps decision making by providing real insights to all stakeholders involved in the manufacturing process.

## OBJECTIVES

- Reduce production times and costs, for this it is important to have access to software that allows a correct management and documentation of information.
- Ensure that work flows are traceable from the receipt of a client purchase order, development designs, work instructions, and the approval of each of the production operations conforming to quality assurance best practices for the industry and keeping a record of all parts and its operations as required by norms such as AS9100.
- Increase sense of operator empowerment and awareness towards achieving production goals and maintain business alignment with company strategy in terms of productivity, zero defects and low costs.
